

Our Vision for the Copenhagen Outcomes

Women from around the world working together in the GenderCC network ,

- reassert, that real solutions to the climate crisis can only be achieved when there is gender justice;
- demand the UNFCCC process to commit to the integration of the gender dimension into all policies, mechanisms, programmes and institutional frameworks;
- urge UNFCCC Parties to adopt a resolution on gender justice which fulfills the binding obligations on gender and human rights that the UN have already endorsed;

Our Vision for the Copenhagen Outcomes

Women from around the world working together in the GenderCC network ,

- call for a one-day plenary session specifically dedicated to gender in order to discuss the gender dimension in the ongoing negotiations before Copenhagen;
- call upon the UNFCCC to acknowledge the many solutions women already have and the actions they take on the ground to mitigate and adapt to climate change;
- suggest a high level expert advisory group on gender whose findings and recommendations should be considered official inputs in the process.
