

GENDER JUSTICE IN TIMES OF A CHANGING CLIMATE

International Conference

December 5th, 9.30 am to 5.00 pm
Hotel Mercure, ul. Roosevelta 20, Poznan
(200 m from Poznan International Fair)

Climate change is leading to enormous ecological, economic, political and social shifts all around the globe. How can we uphold justice in such drastic circumstances? Justice not only between nations South and North, but within societies and in particular between women and men? What can we do to ensure that climate change will not throw us back into times of stark suppression and drastically unequal opportunities? Are the climate policies that exist and are under discussion right now suitable for women and men, in their respective roles and responsibilities? Will they deliver maximum climate, and social benefits? And what can we do to integrate such concerns into climate policies at national and international levels?

Our conference raises these questions, and aims to help all of us give gender issues much needed attention in the climate process.

We invite government delegations, international agencies and all stakeholders participating at COP 14 to join us for a dialogue-based exchange with women and men from around the world.

Programme of the Day

- 9.30am Coffee & Registration
- 10.00am Welcome & Opening
 - Nicole Wilke (Ministry for Environment Germany)
